

# Foodies

"Book your table now for a delightful dining experience!"

# Introduction

Welcome to Reservify, your go-to platform for hassle-free table bookings at your favorite restaurants. Our MERN (MongoDB, Express.js, React.js, Node.js) project aims to simplify the process of reserving tables in advance, ensuring a seamless dining experience for our users.

# Key Features

- 01. User Registration
- 02. Authentication
- 03. Search and Filter
- 04. Responsive Design
- 05. Manage Bookings
- 06. Instant Confirmation

# Technology Stack

Frontend: React.js for building the user interface, with Redux for state management and Material-UI for styling components.

Backend: Node.js and Express.js for server-side logic, with MongoDB as the database to store user and booking information.

# Conclusion

With Reservify, booking a table in advance at your favorite restaurant has never been easier. Our user-friendly interface, real-time availability, and convenient booking management features ensure a seamless dining experience for all our users. Join us today and elevate your dining experience with Reservify!
